

Ugochukwu Victor

Full-Stack Developer • SaaS & API Specialist

Full-stack developer with 3+ years of experience building production SaaS platforms, REST APIs, and client applications. Sole technical implementer of Rise Review, a multi-tenant B2B SaaS built from scratch with Next.js, Express.js, MongoDB, Twilio, OpenAI, and Stripe. Experienced in making independent architectural decisions and delivering complex integrations end-to-end. Currently working full-time as a Frontend UI Developer at CreativeMinds Development.

Education

BSc Computer Science

University of Nigeria, Nsukka (UNN)

11/2021 - 10/2025

Enugu State

- Degree conferred October 2025.

Experience

Frontend UI Developer (Full-time)

8/2026 - Present

CreativeMinds Development

- Built and shipped major feature areas of Curator, a video-based research-ops SaaS platform: team/role-based access control, a multi-step project setup wizard, and a moments & reels curation system, translating complex Figma designs into pixel-perfect, responsive, production-ready interfaces end to end.
- Investigated and resolved legacy codebase issues including WebSocket integration bugs, REST API/endpoint mismatches, and CSS specificity conflicts, working directly with backend engineers to trace root causes across the full stack.
- Working within a structured engineering team using Jira, Postman, and GitHub workflows.
- Stack: React, TypeScript, TailwindCSS, vanilla CSS, JavaScript, WebSocket, TanStack Router/Query, Zustand

Full-stack Developer (Contract)

6/2026 - 9/2026

The Projekt LLC

- Built end-to-end booking flows and post-payment confirmation screens for a children's activities and education booking platform, translating Figma designs into pixel-perfect, responsive interfaces across multiple service types.
- Built customer-facing portal pages including a bookings dashboard, single-booking detail views, and payment history displays, giving customers self-service visibility into booking status and billing.
- Built backend service-layer logic and Prisma-backed data queries powering features end to end, from API route to database to rendered UI, including booking confirmation data, gift card issuance and redemption, and guest invitation tracking.
- Traced and resolved frontend bugs across the booking and portal experience, from UI rendering issues to broken data connections between API routes and components.
- Worked within an organized team using Notion task management, PR reviews, and structured sprint cycles.
- Stack: Next.js, React, TypeScript, TailwindCSS, PostgreSQL, Prisma

Sole Implementer & Lead Tech Adviser

7/2025 - Present

Rise Review (Contract)

- Architected and built a complete multi-tenant B2B SaaS from scratch, serving as the entire engineering function of an early-stage startup.
- Integrated Twilio (WhatsApp/SMS), OpenAI (AI review responses), Stripe (billing), and Apify (review scraping across Google Business, OpenTable, CoverManager).
- Identified and resolved a critical WhatsApp ISV architecture violation pre-launch; delivered founders a concrete fix via Meta Tech Provider Program.
- Built campaign analytics, CSV bulk upload, multi-language support (I18N), idempotency handling, and full session-based auth system.
- Stack: Next.js, Express.js, MongoDB, Twilio, OpenAI, Stripe, Apify, Auth.js, ShadCN, Zustand, Vercel, Render

Frontend Developer Intern

10/2024 - 2/2025

CATA Automated Systems

- Refactored legacy frontend codebase (HTML/CSS/Bootstrap), improving maintainability and UI consistency across production.
- Collaborated with CTO on frontend enhancements and production deployments.

Freelance Full-Stack Developer

1/2023 - Present

Independent

Ikeja, Lagos

- Delivered 4+ client projects including portfolio sites and 3 fintech/investment web platforms with auth, MongoDB, Express.js, and Next.js serverless APIs.

Skills

Frontend

React • Next.JS • TypeScript • JavaScript • TailwindCSS • Framer Motion • Zustand • Recharts • Zod

Backend

Node.js • Express.js • Nest.js • REST APIs • Serverless Functions • MongoDB • Multer • Argon

Databases

MongoDB • PostgreSQL • Supabase

Integrations

Twilio • OpenAI • Stripe • Apify • Resend • Lemon Squeezy • Upstash Redis • Cloudinary • Cloudflare Workers • WebSocket

Tools

Git • Vercel • Render • Auth.js • JWT • AWS

Projects

Rise Review | rise-review.vercel.app (pre-launch)

B2B SaaS for restaurants, hotels, and gyms to automate review generation across Google Business, OpenTable, and CoverManager.

Steeze Boutique | steeze-boutique.vercel.app ↗

Full-featured e-commerce platform built similar to Amazon. Includes multi-currency support, multi-language (l18n), Stripe payments, Auth.js authentication, product search, cart, and order management. Stack: Next.js, MongoDB, Stripe, Auth.js, Zustand, Zod, Resend, TailwindCSS.

HandleScout | handlescout.vercel.app ↗

AI-powered username checker across 15+ platforms in under 3 seconds using concurrent API calls. Stack: Next.js, Supabase, Groq (Llama 3), Upstash Redis.

MedIntel | medintel-web-app.vercel.app ↗

Symptom-based health prediction platform with user dashboard and backend APIs. Stack: Next.js, TypeScript, TailwindCSS.

Certifications

AWS Certified Solutions Architect - Associate (SAA-C03) - Amazon Web Services (AWS)

Currently preparing for this industry-recognized certification covering scalable, highly available, and fault-tolerant AWS architecture.
